EDUCATION

University of Hong Kong, Hong Kong **Jul 2024 – Present**
PhD Candidate in Psychiatry

University of Hong Kong, Hong Kong **Mar 2023**
Master of Philosophy in Psychiatry
Thesis: Application of Statistical Learning Methods to Predict Psychopathological Symptoms and Well-being in Young People

Columbia University Mailman School of Public Health, New York, United States **May 2020**
Master of Science in Biostatistics (Theory and Method) **GPA: 3.5/4.0**
Relevant Courses: Data Science; Relational Databases and SQL Programming; Statistical Computing with SAS

Rutgers University, New Jersey, United States **May 2018**
South China University of Technology, Guangzhou, China (Joint Program)
Bachelor of Science in Public Policy (Health and Environment) **GPA: 3.82/4.0**

HONORS & AWARDS

Early Career Award, Schizophrenia International Research Society (2026)
Postgraduate scholarship, University of Hong Kong (2020–2022, 2024–Present)
Dean's Honor List, Rutgers University (2016–2018)
National Endeavor Fellowship, South China University of Technology (2016)

RESEARCH EXPERIENCE

Research Assistant, University of Hong Kong, Department of Psychiatry **Aug 2023 – June 2024**
• Administered clinical and cognitive assessments and operated MRI scans to patients with first-episode schizophrenia and first-episode bipolar disorder
• Conducted statistical analyses on antipsychotic utilization patterns and mortality risk among patients with psychotic disorders using population-based electronic health record database

Research Assistant, Lee Lab, Columbia University, Department of Psychiatry **2022–2023; 2019–2020**
• Examined developmental patterns of functional reconfiguration using parallel factor analysis on graph-theoretical metrics from resting-state functional connectivity data in typically developing youth (Lifespan Human Connectome Project Development cohort)
• Conducted mediation analyses to assess APOE ε4-associated neuropathologies (e.g., neuritic plaques, Braak stage) as mediators in pathways from genotype to neuropsychiatric symptoms (National Alzheimer's Coordinating Center cohort)
• Applied latent change score models to test longitudinal brain structure-cognition associations

Data Intern, Boricua Youth Study, New York State Psychiatric Institute **Feb 2019 – May 2020**
• Harmonized variables between waves in a longitudinal study launched in 2001 for over 2,000 Boricua children
• Developed codebook for Dialogix system supporting next-generation child health outcome research of Environmental influences on Child Health Outcomes (ECHO) program

TEACHING EXPERIENCE

Research Mentor, University of Hong Kong, Department of Psychiatry **2022–Present**
• Delivered introductory sessions on DSM-5 diagnostic criteria for schizophrenia and bipolar disorder to MBBS students
• Supervised and trained research interns in administering standardized clinical interviews and cognitive assessments in research settings
• Providing mentorship on electronic health record data analysis, systematic reviews, and meta-analyses
